## Showcasing supply chains at SIL

Two Italian companies will present their newest supply chain innovations at this year's SIL Barcelona, which will take place from 5 to 7 June. Nova Systems and Leviahub will attend the trade exhibition to showcase their solutions for the logistics industry, ranging from transport and shipping to customs.

Nova Systems will demonstrate the new version of its Be One software, which is designed to optimise logistics processes. The event will be Leviahub's official debut in a foreign market, where it is looking to establish itself as a supply chain consulting partner.

The companies can be found at stand C322 in Hall 8 of the exhibition, located at Fira de Barcelona's Montjuic Exhibition Centre. (mk)
